PROJECTS

Fill Job | Firefox Extension | React

<https://addons.mozilla.org/en-US/firefox/addon/fill-job/> • October 2023 - August 2024 •

Objective: To remove the repetitive task of form-filling during BD govt. job application.

- Used Mongo DB Atlas to save user data.
- Implemented Mogodb App Service as a backend of the extensions.
- Users can fill all form data at once.
- Used React JS as frontend technology.
- Material UI works as a UI component.

Video Content Website | Animation | GSAP | React

sreenathkumar.github.io/retailer-of-watch-content/

- Implemented almost 30 dynamic animations, enriching the user interface with seamless motion and interactivity.
- Elevated user engagement through the seamless integration of animations triggered on both mouse hover and mouse leave.
- Used SVG animations to animate 3 different SVG.

MyLibrary: Explore and Discover the Best Book of the Week | React Delight

react-library-by-sreenath-kumar.netlify.app/ • November 2023

- Robust search functionality, enabling users to quickly find books by title, author, or keywords.
- Provided users with effortless access to the latest weekly bestseller books, ensuring a user-friendly interface for discovering popular and trending reads. Detailed presentation of author information, ratings, reader reviews, and also the purchase link.
- Adapts flawlessly to any screen size, ensuring a seamless browsing experience on desktop, tablet, or smartphone.

EXPERIENCE

Frontend Developer

- Build 60+ different website with elementor on wordpress.
- Built and customize more than 10 websites with react.
- Integrated backend API with frontend.
- Constructed 2 backend APIs, enhancing the project's functionality and data management capabilities.
- Gained ability to implement new features and scale up the application.

January 2022 - Present
