Career Objective

Aspiring AI-focused Software Engineer with strong Python development skills, eager to work on AI/ML projects, LLM-based applications, and automation tools. Passionate about problem-solving, optimizing AI workflows, and deploying scalable applications.

Skills

Front-End : Next.js, TypeScript, React, JavaScript, HTML, CSS,

Back-End : Python, Django, Fastapi, Node.js, Express.js, NextAuth, Firebase

Database : MySQL, MongoDB, PostgreSQL

AI & ML : OpenAI API, LangChain, Scrapers, NLP, LLMs (ChatGPT, Claude), Vector dbs

Experience:

SDE (Intern)

MindtideAI - USA

October 2024 - Mar 2024

- Developed and integrated **AI-powered chatbots** using **LLMs** and **third-party APIs** (Zendesk, Zoho, Google Chat).
- Built **AI-driven automation workflows** to enhance chatbot response quality, lead generation, and sales automation.
- Optimized **web crawling** and **data processing pipelines**, improving efficiency for dynamic & static websites.
- Contributed to backend services using FastAPI , integrating **AI APIs** and RESTful endpoints.

Projects

JobGenie – Smart Job Portal with GenAI-Powered Career Assistant

[GitHub](#) || [Live](#)

- **Aggregated job listings** from multiple portals using web scraping and API integration, offering a unified job discovery platform.
- Integrated **AI-powered resume analysis and job recommendation system** with personalized match scoring based on skills and job relevance.
- Built intelligent **AI agents for interactive chat**, providing insights on job fit, resume improvements, and personalized career guidance.

Tech Stack : Python, Firecrawl, CrewAI, Gemini, Qdrant, MongoDB, Websockets, celery, Next Js

CodeHack – LeetCode-Style DSA Practice Platform

[GitHub](#) || [Live](#)

- Built a full-stack DSA practice platform enabling user authentication, problem solving, and code submission across multiple languages.
- Integrated **online code execution and evaluation** using Judge0 API, displaying real-time feedback, passed/failed test cases, and runtime stats.
- Implemented **submission tracking** , allowing users to view past attempts, performance.

Tech Stack : Next Js, Node Js, Postgres, Prisma, Judge0

Programming Profiles: - [LeetCode](#): Problems Solved: 150+ - [Codeforces](#): Problems Solved: 50+
