CAREER OBJECTIVE

Passionate and detail-oriented Computer Science graduate with strong expertise in advanced web development, particularly in frontend technologies. Seeking to leverage my skills in website and application development to contribute to innovative projects while continuously growing in a dynamic environment. Throughout my academic journey, I have engaged in various science-related projects, further fueling my passion for innovation.

SKILLS

Languages: Python, C, C++, Java, JavaScript, PHP

Frontend: Tailwind, ReactJS, NextJS, Flutter

Backend: NodeJs, ExpressJs, FastApi

Database: MongoDB, MySQL, Microsoft SQL Server

Interpersonal/Soft Skills: Innovation, Research, Decision Making, Public Speaking, Leadership, Adaptability, and Self-Motivation

WORK EXPERIENCE

Website Maintenance Developer & Technical Support Specialist

Australian Polytechnic University (Remote, Contractual)

Year
2025-present

- Maintain and Update the existing [Australian Polytechnic College's website](#).
- Work on full-stack development for a sister company's website.
- Provide necessary technical information and guidance.

PROJECTS

AusPlanner – Your Career Planner (commercial/contractual work)

[Live link](#)

AusPlanner is a commercial project I developed end-to-end for an Australian consultancy agency, managing everything from web design to deployment. (Note: GitHub repository not shared due to the proprietary nature of the application.)

- **Full hosting setup and deployment:** Configured and launched the website for commercial deployment.
- **Google Sheets API:** Google Sheet allowed the client to an easier access to information.
- **WhatsApp integration:** Direct WhatsApp integration to make it easier for visitors to contact client.

Medical Camp Management System (personal work/ course work)

[Live link](#)
[GitHub link](#)

The Medical Camp Management System (MCMS) is a MERN stack-based web app that streamlines the organization, management, and tracking of medical camps for both organizers and participants.

- **Role-based Dashboards:** Admins can manage camps, while users can manage their payments.
- **User Bookings:** Users can book and pay for camps.
- **Payment System:** Payment system using stripe.

Gari Chai: A car rental website (MERN STACK) (personal work)

[Live link](#)
[GitHub link](#)

A user-friendly platform for renting and listing cars, with real-time updates and interactive dashboards for efficient fleet management.

- **Car Rental System:** Enabling users to rent vehicles for specified durations.
- **Car Rental Listing System:** List your car for rent.
- **Real-time Car Management:** Car owners can manage their cars in real-time.
