**Backend** : Node.js | Express.js | Mongoose | MongoDB | Zod

**Tools** : Git | Github | Postman | MongoDBCompass | Vercel | Netlify | Firebase

## Freelance Projects

### Online Islamic School

[Live View](#)

(February 2025 – April 2025)

- Built a complete educational platform with attractive homepage, secure authentication system (including Google), dynamic course pages, bKash enrollment system, blog features, & instructor registration options.
- Developed feature-rich user and admin dashboards with real-time stats, monthly payment system, course and blog management tools, advanced search and filtering options, and instructor approval workflows.

## Recent Projects

### E-commerce

[Live View](#)

||

Github Code =>

[Frontend](#)

| [Server](#)

Users can browse product items, add to cart or wishlist, write reviews, and place orders while admins manage products, categories, orders, and reviews securely.

#### Features:

- Fully responsive UI with smooth navigation, dynamic search, filter, pagination, product details, cart, wishlist, checkout, and order success—built with modern UI tools and secure routing.
- Admins can manage categories, products, orders, and reviews from a powerful dashboard with role-based access, real-time stats, chart summaries, and modal-based actions.

**Technologies Used:** TypeScript, Next.js, Redux, Shadcn.ui, Node.js, Express.js, JWT, Mongoose & MongoDB.

### BrainWave (Team)
