WORK EXPERIENCE

Frontend Developer

Next3.0 | [2020 - Present | Northcarolina, USA]

- Developed and maintained responsive websites using WordPress, including extensive work with Elementor, Divi, WooCommerce, and a wide range of third-party integrations.
- Leveraged modern web development technologies including JavaScript, TypeScript, React, and Next.js to build scalable, high-performance frontend applications.
- Applied mobile-first and responsive design principles to provide seamless cross-device user experiences.

Portfolio Projects:

Formio: <https://formio-ten.vercel.app/>

A fully custom AI-powered feedback form generator built with Next.js, TypeScript, and Tailwind CSS. The platform allows users to generate forms based on prompts, edit them dynamically, analyze sentiment in collected feedback using AI, and create custom email templates with prompt. Implemented Redis, PostgreSQL, and BullMQ for background job processing, showcasing both frontend and backend integration expertise.

Freelance WordPress Designer

Upwork | [2019 - 2022]

- Offered WordPress design and development services to clients on Upwork platform.
- Earned Top Rated Seller status for delivering excellent results and garnering positive feedback from clients.

Portfolio Projects:

Smart Beee: <https://smartbeee.co.uk>
