OBJECTIVE

I have a great passion on web development. I want to make my career shining with the achievement in full stack web development. I recently finished my front end web development course with a little about of backend technologies. I'm now able to make contribute in front end projects. I am eager to share my gained skills with team and also want to learn more with them.

PROJECTS

SecondDeal

SecondDeal is a marketplace web application where users can buy and sell used items easily. The platform allows users to post listings, browse available products, and communicate securely with sellers.

- Post & Sell – Easily list your used or second-hand products.
- Smart Search & Filters – Find exactly what you need quickly.
- Real-time Chat – Connect with buyers & sellers instantly.
- Track Transactions – Monitor your sales and purchases effortlessly.

Technologies : NextJs, Redux, Socket io, Typescript, Tailwind Css, ShadCn Ui, Mongodb, Mongoose, Node js, Express Js, JWT, Zod.
