## CARRER OBJECTIVE

Proficient in ReactJS, JavaScript, NodeJS, ExpressJS, MongoDB, Tailwind CSS. I aspire to utilize my technical skills to gain success in dynamic tech projects, seeking an environment to apply my expertise. Passionate about Modern Front-end and Back-end frameworks and continuously trying to improve myself to be an expert Full Stack Developer.

---

## SKILLS

**Front-end:** Tailwind CSS, JavaScript, React.js

**Back-end:** Node.js, Express.js

**Database:** MongoDB

**Others:** GitHub, Firebase, JWT, Shadcn, Netlify, Vercel

**Currently learning:** Next.js, Typescript, Mongoose

---

## PROJECTS

**FastPathao - Parcel Management System**                    Live Site | Client Code | Server Code

A Parcel Management Platform designed to streamline logistics, improve parcel tracking, and enhance order management.

- Implemented secure user authentication with email/password or social logins and role-based access.
- Developed parcel management and real-time tracking features for users.
- Built an admin dashboard for managing users and parcels, with JWT-secured routes.

**Technologies:** React.js, JavaScript, Tailwind CSS, MongoDB, Express.js, Firebase, JWT, shadcn

**Madchef - Restaurant Management Platform**                    Live Site | Client Code | Server Code

Madchef improves restaurant management, enhances customer experience, and builds a strong online presence.

- Enhances restaurant operations with user-friendly management of food items, orders, and staff.
- Provides secure and personalized experiences through authentication and private routes.
- Engages users with a visually appealing interface, theme customization, and interactive features.

**Technologies:** React.js, JavaScript, Tailwind CSS, MongoDB, Express.js, Firebase, JWT

**EquiSports - Redefining Sports Management**                    Live Site | Client Code | Server Code

EquiSports offers a seamless shopping experience for sports enthusiasts, combining convenience and functionality.

- Facilitates dynamic management of sports equipment with add, update, and delete functionalities.
- Ensures secure user experiences with Firebase authentication and personalized dashboards.
- Provides accessibility across devices with a responsive design and light/dark theme customization.

**Technologies:** React.js, JavaScript, Tailwind CSS, MongoDB, Express.js, Firebase, JWT

---

## PROBLEM-SOLVING STATS                    Codeforces profile | Beecrowd profile

**Codeforces:** 106 A & B level problems
**Beecrowd:** 136 problems

---

## EDUCATION

**B.Sc. in Software Engineering**
Daffodil International University, 2023 - Present

---

## HOBBIES AND INTERESTS

Real-world projects, UI/UX design, tech trends

---

## LANGUAGE

1. Bangla (Native)    2. English (Comfortable)
