## PROFESSIONAL SUMMARY

**Frontend Developer with nearly a year of experience developing and implementing dynamic, responsive web applications using React, Next.js, and Tailwind CSS. Skilled in translating UI/UX designs into efficient code, validating cross-browser compatibility, and optimizing performance. Currently planning to expand skills into backend development to become a full-stack engineer.**

## SKILLS

**Frontend:** HTML, CSS, Javascript, Tailwind CSS, ReactJs, NextJs, Axios, Firebase

**Backend:** MongoDB, Mongoose, Node.Js, Express.Js

**Tools:** Git, GitHub, Netlify, Vercel, Figma

**Soft Skills:** Active listening, Adaptability, Punctuality, Self-Discipline, Time Flexibility, Time Management

## EXPERIENCE

**Front-End Developer (Full-Time)**

**Codelabs Digital | Sylhet, Bangladesh (Remote) | August 2024 – April 2025**

❖ Developed and maintained a modern dashboard template initially built with HTML, and later converted into multiple versions using React, Next.js, Vue, and Nuxt. - *Web Presence*

❖ Optimized UI components to boost performance, usability, and user interaction across various devices.

❖ Delivered responsive, reusable design systems, ensuring seamless cross-platform compatibility.

## PROJECTS

**Medi Sphere -** *Web Presence* | *GitHub* | *Admin Credentials*

**Technologies**: Next.js, TypeScript, Redux Toolkit, NextAuth, Axios, Radix UI, Tailwind CSS, Framer Motion

**Duration: 6days | Type: Full stack E-commerce (Group Project)**

**Overview: A full-stack online pharmacy platform where users can explore and order medicines, and admins can manage users and orders through a secure dashboard.**

❖ Directed a 4-member team in building a responsive and scalable e-commerce web app, applying clean architecture principles and maximizing component reusability for faster development cycles.

❖ Engineered key UI sections including the homepage, about page, and admin dashboard using Radix UI and Framer Motion, improving user interaction and visual appeal.

❖ Constructed secure admin routes to view user profiles and manage order statuses in real-time.

**Rentify -** *Web Presence* | *GitHub* | *Admin Presence* | *Admin Credentials*

**Technologies:** React.Js, Firebase, Mongoose, React Router, Node.js, Axios

**Duration: 1.5month || Type: Full stack E-commerce (group project)**

**Overview: A full-featured real estate platform where users can buy, sell, or rent properties, while verified owners and admins manage listings and requests through separate dashboards.**

❖ Implemented essential features such as property posting, bookmarking, and user reviews, enhancing user engagement and overall platform usability.

❖ Developed a secure, role-based owner dashboard, allowing verified users to manage listings and streamlining admin approval through a custom property verification system.

❖ Built and integrated a standalone admin panel, enabling efficient request tracking, approval workflows, and filter-based property categorization for improved site management.
